

March 14, 1947.

Dear Atwoods-

7-2-47
Your package came in just as I was starting this letter:
Thanks loads; it will certainly be useful, and we appreciate
it highly.

What I started to write about was this: Gopal was through here
a few days ago, having just left St. Louis, and carried the
story that Sol was leaving Washington to go to Paris. The report
sounds authentic. If that were true, it occurred to Esther that
Kim's plans might be threatened, so I thought I'd write this
on the chance that you had not yet heard about it. If so, I
would like to suggest that you think about Yale as a place to set
for a while. Tatum is still building his group, and I think can
particularly use a post-doctoral fellow. Nils Fries is here now
but for six months only, and I will be back in Med School in the
Fall, (with strong hopes of a Ph.D. by then, according to Tatum.)
So, there may likely be room, and I think particularly so with a
thorough genetic training like yourself. But it would still be a
matter of selling KCA to Yale rather than Vice versa, so I won't
enlarge too much on the glories of this place. Think about it
though. I haven't been in NY lately, but till the next time,
as ever, (and with best from Es)
